Thanks Brian. I had a discussion with Patti-Kay this morning and am researching the contaminant - although there's not much out there.

Hi Steve – not sure if you are being kept up to speed on this, but there may be WSI involvement here, so thought I'd send along. Interesting article...not sure if you are familiar with the specific chemical, 4-methylcyclohexane methanol.

[REDACTED]

As I mentioned on the phone, Kevin T has been in touch with our EOC, Shelley, and his contact at FEMA about this incident. Kevin will keep you in the loop on any info we hear, and please keep us posted on WARN and WV American activity.

If the WARN or utility requests any information about decontamination or recovery, feel free to pass along the below resources. Others from EPA who have suggestions on further materials/guidance are welcome to pass them along.

- Decontamination and Recovery Planning (EPA):
http://water.epa.gov/infrastructure/watersecurity/upload/2008_10_29_watersecurity_pubs_report_deco
- Planning for and Responding to Contamination Threats to Drinking Water Systems Modules (EPA):
<http://water.epa.gov/infrastructure/watersecurity/emergencyplan/index.cfm#pp8>
- Emergency Disinfection of Drinking Water (EPA, for consumers):
<http://water.epa.gov/drink/emergencydisinfection.cfm>

Thanks,

Bailey

Subject: RE: WV Drinking Water Emergency

There have been some communication between NCR and WV, but I suspect that WV American has this in hand and likely would pull from corporate resources if necessary.

The question I pose to EPA is what if any guidance do we have from WSi...flush or don't flush, what about homeowners? Hot water tanks...washing machines, ice makers etc.

Could example for why states should use *Planning for an Emergency Water Supply*.

Have you heard anything from WVWARN concerning the chemical spill?

Thanks,

Bailey

Subject: WV Drinking Water Emergency

Hello All,

There are bound to be lessons learned from this chemical spill in WV that has created a drinking water emergency:

<http://www.foxnews.com/us/2014/01/10/west-virginia-chemical-spill-gov-declares-emergency/>

I wonder if WV WARN has gotten involved? This might be a good ER case study to capture when the dust has settled.
